STENCIL, MISPRINT, SQUEEGEE cleaning
PUMPRINT cleaning
PCB cleaning
GENERAL INFORMATION

The InJet 388 series cleaning systems represent unique vertical Spray-In-Air technology developed and manufactured by DCT.

The vertically installed Spray-In-Air device minimizes the shadowing effect commonly seen in horizontal cleaners, and maximizes the efficiency of the cleaning process as the cleaning fluid is sprayed directly onto the cleaned component.

**The InJet® 388 TRIPLE CRRD**, including a 100% closed loop, with cleaning, rinsing and drying technology processes.

All of the processes are fully automated, and take place in 3 process chambers, whereby the cleaning takes place in the first inlet chamber, after which the part which is being cleaned is automatically transported to a central chamber where the first rinsing process takes place. The third, and last, outlet chamber is designed for the final rinsing and the drying process.

All 3 chambers can be used in parallel, which increases the machine's capacity and reduces cross-contamination when compared with single-chamber devices.

Depending on your cleaning requirements, the DCT project manager, in collaboration with a local distributor, will advise you on a suitable water-based cleaning fluid and the correct setup of the entire process.

### DIMENSIONS

- Dimensions: 1205 mm x 3200 mm x 1860 mm
- Weight: 890 Kg
- Energy consumption: 1.65 kWh
- Cleaning fluid consumption: 0.05 – 0.3 l per cycle
- Compressed air consumption: 2 l / 5 Bar per cycle
- Max. dimensions of the cleaned parts: 100 x 810 x 740 mm
- Spraying pressure: 2.4 Bar
- Cleaning fluid flow rate: 200 l / min
- Temperature range setting: From ambient temperature to 60°C
- Noise level: < 70 dB
- Device control: PLC + 8.4” touchscreen

### MINIMUM SERVICE SPACE AROUND THE MACHINE

- Dimensions: 600 mm x 600 mm x 600 mm
- Open door: 450 mm x 450 mm x 450 mm
- Service area: 600 mm x 23.6 in x 600 mm x 23.6 in x 600 mm x 23.6 in

STANDARD HARDWARE EQUIPMENT

- 3 process chamber – fully automated solution
- 100% closed loop fluid system
- 3 arm rotation – fluid powered - cleaning
- 2 arm rotation – fluid powered - rinsing
- Cleaning and rinsing fluid heating
- High-capacity mechanical filtration on all cycles
- 2 hot air blowers – drying
- Chimney flap – electronically controlled
- Pneumatic door lock
- Emergency stop button
- Manipulation wheels – lockable
- PLC controller + 8.4” touchscreen display
- Spare parts (base kit)

STANDARD SOFTWARE EQUIPMENT

- Electronic monitoring of fluid level
- Electronic monitoring of fluid pressure
- 3 levels of logging – operator, maintenance, engineer
- Spraying fluid pressure - continuous measurement
- Standard software language mutation – CZ, ENG
- Liquid and filter replacement notification – cycle counting
- Possibility of 5 programs – setting option
- Smart warning – low or high pressure level
- Smart warning – low fluid level
OPTIONAL HARDWARE EQUIPMENT

- Common fluids draining - manual control
- Automatic fluids refilling (without pump)
- Automatic fluids discharging (without pump)
- Tanker 200 or 400 lit - cleaning/rinse fluid
- Filtration 2PR sandwich - integrated
- Filtration sandwich – external
- Conductivity measurement – pre-rinse/rinse 0-2000 µS – blocking optional
and other equipment ...

OPTIONAL SOFTWARE EQUIPMENT

- Electronic monitoring of fluid level
- Electronic monitoring of fluid pressure
- 3 levels of logging – operator, maintenance, engineer
- Spraying fluid pressure – continuous measurement
- Standard software language mutation – CZ, ENG
- Liquid and filter replacement notification – cycle counting
- Possibility of 5 programs – setting option
- Smart warning – low or high pressure level
- Smart warning – low fluid level

OPTIONAL ACCESSORY – FRAMES AND OTHERS

- Mechanical carrier frame – PCB
- Mechanical carrier frame – frameless stencils
- Mechanical carrier frame – frame stencils
- Mechanical carrier frame – VectorGuard stencils
- Mechanical carrier frame – squeegees

OPTIONAL TRACEABILITY

- Traceability OFF line, CSV to SD card
- Traceability OFF line, Reader, CSV to SD card
- Traceability ON line, PC WIN, file
- Traceability ON line, READER, PC WIN, file
- Traceability ON line, PC WIN, OPC Server CD, no file
- Traceability ON line, PC WIN, READER, OPC Server CD, no file
DCT QUALITY

All of the InJet®, AirJet® and Sonix® cleaning systems developed by DCT are characterised by the highest quality on the market, high reliability, ease of use, simple maintenance, an extremely long lifespan, and the longest warranty on the cleaning system market.

These afore-mentioned benefits are achieved by the precise manual production of the machines in the Czech Republic, and thanks to the superior quality of the used materials and components.

Cleaning systems boast a unique all-stainless-steel construction, which is welded manually from AISI 304 and AISI 316 stainless steel and then chemically passivated.

The cleaning systems are designed and manufactured with a focus on ease of use by operators, simple maintenance, and smart process parameter setting.

They are equipped with industrial PLC IDEC, a well arranged colour touch display with 3-level access (operator, maintenance, engineer), and with 5 adjustable cleaning programmes as standard.

The device automatically and permanently checks all processes, operating fluid levels and process temperatures, and also gives timely notification of the need to replace individual consumables or fluids.

Monitoring of the cleaning process history, whether offline or online, is ensured by an optional traceability function.

A wide range of standard hardware and software equipment is available for every cleaning system. However, DCT also excels by its flexibility when resolving non-standard machines and their accessories.

For more information, a list of options and a selection of suitable equipment, please contact a DCT specialist in your country or the manufacturer directly.

STAINLESS STEEL DESIGN:

- main support frame
- storage tanks
- process chambers
- fluid and air distribution systems
- spray arms and nozzles
- mechanical high-capacity filters
- process chamber door frame and handle
- external shielding
- active filters for rinsing DI water

For more information, a list of options and a selection of suitable equipment, please contact a DCT specialist in your country or the manufacturer directly.
